

The figure is a line graph showing the cumulative distribution function (CDF) of the payload size. The x-axis is labeled 'payload size (kB)' and ranges from 0.0 to 1.4 with major ticks every 0.2. The y-axis is labeled 'CDF' and ranges from 0.0 to 1.0 with major ticks every 0.2. The curve starts at (0,0) and remains very close to zero until approximately 0.4 kB. It then rises gradually, reaching a CDF of about 0.8 at 1.0 kB. Finally, there is a very sharp vertical jump at 1.4 kB, where the CDF reaches 1.0. The area under the curve is shaded in light blue.
